1 Intruduction

Here are some backgrounds, applications, problems about this paper.

6 Conlusion

Here are our conlusion from our model design and experiment results.

2 Related Works

Here are some diffirences and relations between my work and other related works.

3 Model

Here are our proposed model structure including CNN design, some data augmentation skills and some other novel algorithms designed by us.

4 Experiments

Here are some metrics settings, traning details including learning rate strategy and SGD hyperparameters, experiments between ours and other works, ablation study within the whole model design.

5 Future Works

Here are some future hintons, due to some problems that our work has not conquered, and propose some novel ideas for other research.
